ECO-COMPATIBILITY

We want to help protect the environment by reducing the use of plastic and using recycled and recyclable packaging.

In the same way that we are close to workers, we are also close to our planet and aware that it is our responsibility to protect it, regardless of the activities or work we do. Protecting the environment is a global responsibility.

Recycle, reuse and sustain.

There are three imperatives of the company's environmental sustainability policy, which in recent years has focused on packaging materials and product presentation.

ISSALINE products have been pioneers in the use of cardboard packaging, so the company understands and addresses the need to work in a more environmentally responsible way, recycling, reusing and reducing the waste of materials in order to improve our environmental footprint.

Plastic free

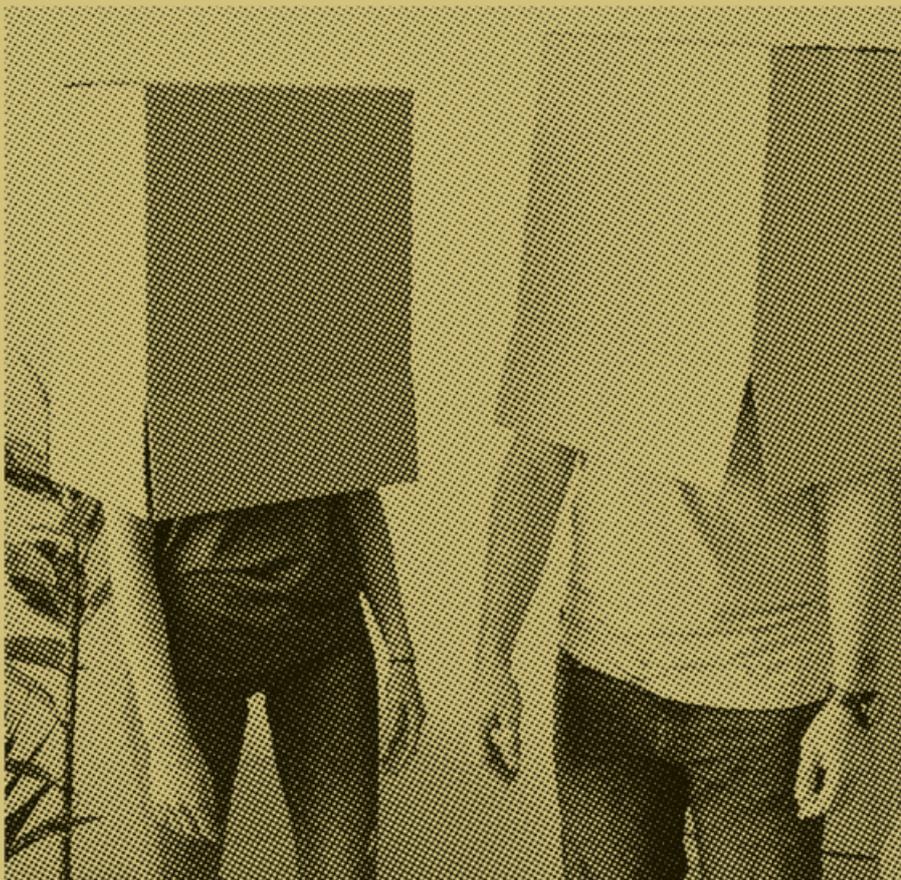

We are firmly committed to reducing the use of plastic or derivative packaging (where possible); using recyclable cardboard boxes as an alternative for the packaging of our products.

Sustainable boxes

ISSALINE is committed to the use of this packaging system, which is more environmentally sustainable than plastic as it is boxes made with recyclable cardboard. A packaging system, which not only helps us to generate a lower environmental impact, but also facilitates the display of the product at the point of sale along with its better image. Furthermore, its resistant structure prevents damage to garments or products during handling or transport and consequently provides added value to the product.

Packaging reuse

We have optimized our management system for receiving and sending goods, so that we can reuse practically all the packaging used for the transport of goods. That is the reuse of the container boxes that we receive in our warehouses to contribute as much as possible to minimize the waste of raw materials.

MERCHANDISING BOX & DISPLAY

A new way of packaging the products

To give more emphasis to the quality and originality of the garments included, but also a quick and easy way to give more color, attractiveness and order at the outlet.

ESPOCUB “Floor display for a well-organized shop”

The setback in the garment's sale is often linked to a bad and untidy layout of goods. Issa's boxes and display system, helps dealers in having a tidy, compact and well-assorted layout of goods. It is only 60 cm long and 45 cm wide and can keep up to 36 items to be exposed in 3 different references and in more sizes.

Our suggestion is: choose the 3 more interesting garments in the pre-assembled display version, show only 1 piece / model and place the Espocub in a visible corner of your shop.

ISSALINE

EXTREME safety shoes

Issaline wanted to transfer the Extreme concept from clothing to work shoes; in fact, has been studied a new line of safety shoes that wants to “break” with the past and use materials that come from the world of sports footwear. The new dual-density PU sole and the use of SHK System (shank) guarantee excellent comfort on any type of terrain.

The advancement of technologies and the desire to always achieve the best results have made it possible to create safety footwear for working in the most total safety without sacrificing comfort.

SHK SYSTEM: nylon shank drowned in the back of the shoe with stabilizing effect of posture and control of the correct flexion point of the sole.

Sizes: 36-48

Colour: gray with black and yellow inserts

INDUSTRY PLUS

Given the high reliability of the Industry double density sole, we created an ISSALINE Industry Plus range which, starting from the same tread, it develops "richer" uppers and seeks flexibility and lightness also thanks to the use of fiber glass toe cap and textile anti-perforation insole. Other characteristics of the range being Metal Free (could there are exceptions) and have colored soles. All this with a surprising prices, giving to ISSALINE Industry Plus the range of ISSALINE footwear with the best price/quality ratio.

from cotton to technical fabrics, perfect clothing for work and leisure

The workwear ranges ISSALINE are designed to meet the needs of all professionals who require comfort and safety at work. Thanks to sixty years of experience in PPE market, ISSALINE offers workwear specifically designed to guarantee comfort and practicality, without neglecting the the most up-to-date style and design.

All workwear, designed to facilitate movement, is available in a wide range of solutions to meet the needs of the most demanding workers. Besides winter clothing, waterproof and breathable (also in thermal underwear version) summer clothing completes the assortment, an essential range for those who work hard, even in hot weather.

WHAT IS THIS YELLOW LABEL?

All our garments equipped with a yellow label showing the RdP number (Test Report) / Certificate issued by the Ritex accredited laboratory, are certified as PPE in "CAT. I" while garments that are not CE marked or generically CE marked, or not accompanied by certification, ARE NOT PERSONAL PROTECTION DEVICES, but generic clothing.

the tests necessary for the RdP / certificate also serve to check the resistances of the materials that must be equal to or higher than our standards.

ISSALINE COTTON EUROPA

This range of workwear has a classical cut and more popular standard colours: blue and green. The fabric is 100% sanforized dyed cotton (blue HIDRON dyeing, other colours with REACTIVE dyeing), 250 g/m² weight, washable up to 60°. Double sewing in the most stressed areas made with very resistant yarn. All garments have elastic on cuffs that can be removed easily except for the short jackets that has buttons. All fastening buttons are covered by flap. These garments have been designed to be used for general purposes and have a good value for money, so they can be a good choice for big Companies. It is possible to customize them with serigraphy, embroidery, or welded labels.

THE SPECIALIST OF STRETCH

Seventeen years ago we introduced the STRETCH concept into the world of workwear. It seemed an impossible challenge but more than 6 million garments sold proved the opposite. From 2017, with the STRETCH EXTREME line, and in 2021 and 2022 with the START and BOOM lines, due to the technical solutions and renewed fit and design, ISSALINE is seeking to consolidate its leadership in workwear.

ISSALINE MULTI-PROTECTION M-PRO

For descriptions go to the **INDUSTRIAL STARTE 2022** general catalog

MULTI-PROTECTION CLOTHING

With almost 60 years of experience in the production and distribution of ppe, we are pleased to present the new issaline m-pro project, a complete range of multi-purpose clothing. In developing this project. We have been guided by the desire to offer, to those who work in areas of high risk, the maximum and most up-to-date protection against the important risks to which they are subject in carrying out their work. In line with what has just been said, ppe has in fact the maximum number of possible protections, resulting in the majority of cases pentavalenti, atex and iii category certificates. Finally, the tradition accumulated. In workwear helped us not to underestimate the aspects relating to comfort and wearability, non-secondary characteristics for those who must wear these garments for the whole day.

TECHNICAL SOCKS | SSALINE

ALL SEASONS

01COFFL OFFICE

Meryl Skinlife, a technological bacteriostatic fiber, prevents the formation of bad odors. Anallergic and breathable, with heat-regulating properties. The particular elasticity, the industrial prewashing, and the aforementioned features make this sock a versatile product ideal for all seasons, except in extreme situations.

Composition: 100% Meryl Skinlife
Sizes: S (35-38 conformed woman), M (39-42), L (43-46), XL (47-50)
Color / length: black / long

 in blister
Minimum order: 3 pairs for size
Full box: 24 pairs.

ALL SEASONS

01CBASF BASKET

The Dupont Coolmax fabric favors the outward expulsion of sweat, giving the foot excellent heat regulation. The average density structure, the elastic on the foot and the anatomical reinforcements provide protection from impacts and micro-traumas while at the same time carrying out a relaxing action.

Composition: 60% polyester, 25% cotton, 12% polyamide, 3% elastane
Sizes: S (35-38 conformed woman), M (39-42), L (43-46), XL (47-50)
Color / length: grey / average length (American)

 in blister
Minimum order: 3 pairs for size
Full box: 24 pairs.

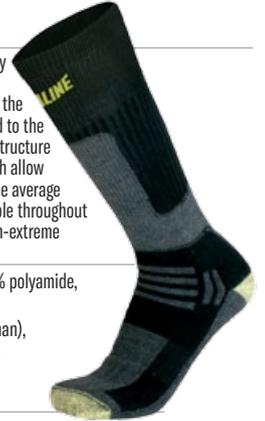

ALL SEASONS KEVLAR® REINFORCEMENTS

01COKVL KV

The use of Kevlar, a high-tensile fiber, guarantees this innovative sock with extreme resistance on the toe and heel, the parts subjected to the greatest friction. The anatomic structure and the graduated pressure mesh allow use for both work and sports. The average weight of the sock makes it usable throughout practically the entire year, in non-extreme conditions.

Composition: 62% cotton, 25% polyamide, 8% elastane, 5% aramid

Eye protection

bouton[®]
OPTICAL

LENS TECHNOLOGY

for over 60 years, Bouton[®] has built its reputation on the development of protective eyewear that workers want to use. Focusing on innovation and style, Bouton[®]'s heritage continues even today.

PROTECTION IS A MUST COMFORT IS AN EXTRA OPTIONAL

Approximately 20,000 eye injuries occur every year at work. 60% of these injuries occur while workers are not wearing eye protection.

The American Academy of Ophthalmology estimates that almost 90 per cent of all eye injuries could have been avoided by wearing protective eyewear.

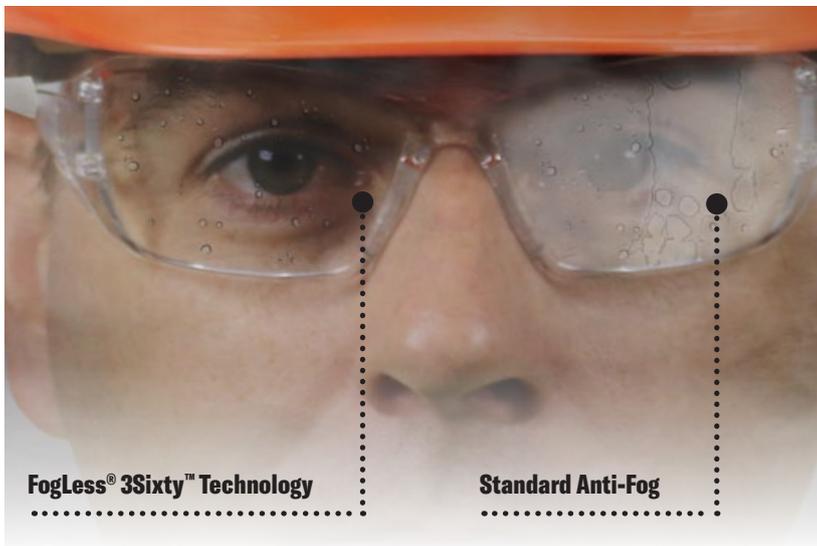

IT IS NO LESS TARNISHED IT IS FOGLESS

Lenses fog up for many reasons, all related to the ambient temperature and air humidity. When a rapid change in temperature occurs, micro droplets of water in the air accumulate on untreated lenses, causing them to fog up and impeding vision.

FogLess® 3Sixty™ technology offers the best anti-fog prevention when:

- Transitioning between hot and cold environments
 - Working in a humid or wet environment
 - Participating in an activity that causes perspiration
- Use with respiratory equipment

Available in models: **NEPTUNE** and **SQUADRON**

BRING TECHNOLOGY Anti-Reflective PLUS™ technology TO THE OUTDOORS WITH THE MIRROR PLUS LENS

A mirror coating on the outer face of the lens deflects sunlight from the user's eye, providing significantly greater glare and reflection reduction than with normal dark lenses. In addition, the **Anti-ReflectivePLUS™** coating, significantly reduces the light that reflected towards the user's eye, providing greater comfort and better performance.

Available in models: **BOND**

EAR PLUGS

EZ-Twist

267-HPF610-EN

The hybrid foam plug and single stick allow for easy insertion.

No need to roll before fitting. Ideal for use with dirty hands
 PowerSoft™ technology is a flexible polyurethane foam with optimal expansion for all-day comfort
 Form-fitting to most ear canals for maximum sound attenuation
 Detectable metal insert (blue). Available for use in the food industry

SNR: 38

Composition: polyurethane foam

Shape: cylindrical with stick

Detectable: no

Cord: no

Colour: orange

Box count: 200 pa.

Full box: 10 cartons, total 2000 pa.

SoftStar™

267-HPF710-EN

The softest and most comfortable cylindrical earplug.

Its unique bevelled edges facilitate insertion PowerSoft™
 Polyurethane Foam without PVC*
 PowerSoft™ technology is a flexible polyurethane foam with optimal expansion for all-day comfort
 Form fit for most ear canals for maximum sound attenuation

*Most PVC formulations are listed in Prop 65 as controlled material.

SNR: 36

Composition: polyurethane foam

Shape: cylindrical

Detectable: no

Cord: no

Colour: red

Box count: 200 pa.

Full box: 10 cartons, total 2000 pa.

MEGA

BULLET™

267-HPF210-EN

Conical-shaped earplug for easy insertion.

Fits most ear canals
 Easy molding for quick and easy insertion
 PowerSoft™ technology is a flexible polyurethane foam with optimal expansion for all-day comfort
 Shape fits most ear canals for maximum sound attenuation
 Also available with a detectable metal insert (blue) for use in the food industry

SNR: 38

Composition: polyurethane foam

Shape: conical

Detectable: no

Cord: no

Colour: orange

Box count: 200 pa.

Full box: 10 cartons, total 2000 pa.

EAR MUFFS

SOUND THRESHOLDS

The dB scale is logarithmic: an increase of 1 dB = 10 times louder. If hearing protection is worn for only 4 hours out of an 8-hour day, the effective protection provided by all hearing protectors will be reduced to only 3 dB. Hearing protection that is too high can cause communication difficulties and generate risks associated with hearing protection.

CLASSIC

263-NP220

Lightweight and comfortable, with the best value for money.

Sliding size adjustment for easy fitting and additional comfort.
Low-profile design increases stability and reduces the risk of snagging in confined spaces.
Lightweight headphones with a soft nylon arch.
Dielectric/non-conductive design.

SNR: 29

Box count: 1 pcs.

Full box: 25 pcs.

ELEVATE

263-NP221

Foldable headphones for easy transport when not in use.

Height-adjustable sliding headband for easy adjustment and additional comfort.
The headband distributes pressure evenly and ensures that the pads remain in their correct position.
Minimal pressure on the top of the head.
Soft, wide ear pads fit comfortably in the ears.
Foldable headband for easy transportation when not in use.

SNR: 27

Box count: 1 pcs.

Full box: 20 pcs.

ELEVATE II

263-NP222

Adjustable arch for a unique fit.

Height-adjustable sliding arch for easy adjustment and additional comfort.
The headband distributes pressure evenly and ensures that the pads remain in their correct position.
Minimal pressure on the top of the head.
Soft, wide ear pads fit comfortably in the ears.

New BIODEGRADABLE

SH383

SHOWA 383 is the world's first biodegradable work glove! Its reduced thickness provides the 383 with optimal tactility when yes work on delicate projects. Designed to provide comfort and flexibility during extended use, the 383 incorporates our Eco Best technology, making it biodegradable.

Material: 13 seamless needles made of biodegradable polyester

Coating: microporous nitrile with S-embossing

ADVANTAGES:

- Thin palm material
- Thin finger thickness
- Embossed microporous nitrile coating
- Lightweight
- Optimal liner design
- Engineered yarn
- Eco Best Technology® (EBT)

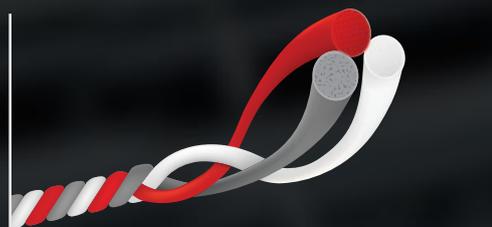

APPLICATIONS:

Complex parts management. Lightweight assembly of oiled parts. Mechanics and engineering. Automotive repair and maintenance. Formwork. Assembly of components. Heavy equipment operation. Tool operation. Transportation

Sizes: L - XL - XXL
Sizes on request: S - M

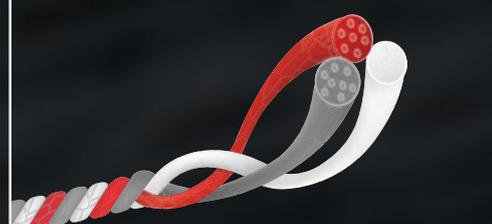

Minimum packaging: 12 pa.
Full box: 144 pa.

G-Tek
PolyKor
XRISTAL™

G-TEK® PolyKor Xrystal represents the evolution of the PolyKor™ fibre, combining the fibre itself with naturally crystallised. The result is a fibre super strong, durable and cut-resistant fibre that represents the pinnacle in terms of performance.

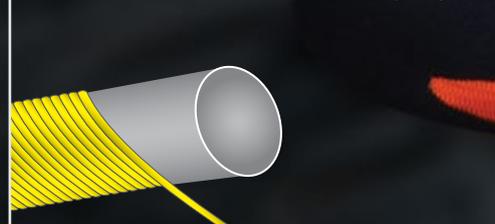

G-Tek
PolyKor™

The new PolyKor® fibre optimises performance, functionality and protection, using a mix of fibres selected by PIP, making it capable of to exceed the standards. The ultimate goal is to provide durable gloves at an affordable price, ready for everyday use.

G-Tek
PolyKor
X7™ TECHNOLOGY

PolyKor® X7™ technology represents the latest innovation in the development of shear-resistant fibres. This reinforced yarn guarantees very high cut resistance and extended durability thanks to the properties of the materials added to the normal HPPE fibre. The result is an exceptional resistance with a very thin yarn.

G-Tek
KEV™

Utilises the strength of DuPont™ Kevlar® fibre and combines it with a proprietary technology for maximum resistance to cut and protection from slight heat sources.

G-Tek
PolyKor™

ANSI A3 EN 388 16-3400R L CUT 4543

G-Tek
Suprene™

The latest breakthrough in the field of nano-materials has led to the creation of Suprene™ a fibre with unrivalled strength and physical properties.

THE IMPORTANCE OF GRIP IN HAND PROTECTION. COATINGS AND PROTECTION.

Thick, hard materials, such as latex and nitrile, offer a good level of protection when handling heavy objects with jagged or irregular edges.

However, the coating is easy to cut if used with thin, sharp edges and does not offer the extra protection needed.

Grip is crucial because it prevents objects with sharp edges from slipping and coming into contact with hands and arms.

COATING MATERIAL	COATING TYPE	COATING BREATHABILITY	USE	LIQUID PERMEABILITY	PROPERTIES	COATING COMPATIBILITY	GRIP	FLEXIBILITY & TACTILE SENSITIVITY	TEMPERATURE RANGE PERFORMANCE
LATEX	Crinkle	None to Low	Heavy Duty	None to Low	- Very high elasticity - Flexibility - Durability, comfort and fit - Good grip - Cut and puncture resistant	- Water - Alcohols & ketones - Diluted acids & alkaline solutions - Biological fats/proteins	- Superior Dry & Wet	Medium	Superior Cold
NITRILE	Foam	Medium to High	Medium to Heavy Duty	Medium to High	- Good elasticity - Tough, tear resistant	- Industrial oils - Fluids & organic solvents	- Good Dry - Good Slightly Oily or Wet	Medium to High	Superior Warm
NITRILE	Flat/Smooth	None to Low	Medium to Heavy Duty	None to Low	- Good elasticity - Tough, tear resistant	- Industrial oils - Fluids & organic solvents	- Superior Dry	Low to Medium	Superior Warm
NITRILE 1-LAYER	MicroSurface	None to Low	Light Duty	None to Low	- Good elasticity - Tough, tear resistant	- Industrial oils - Fluids & organic solvents	- Good Dry - Good Slightly Oily or Wet	Medium	Moderate Warm
PPU	NeoFoam	High	Medium to Heavy Duty	High	- Good elasticity - Tough, tear resistant	- Industrial oils - Fluids & organic solvents	- Good Dry - Good Slightly Oily or Wet	High	Superior Warm & Cold
PU	Textured	Low to Medium	Light to Medium	Low to Medium	- Thin coating that stands up to abrasion and tear - Excellent for precision handling	- Residual oils - Some organic solvents & oxidation	- Moderate Dry - Good Slightly Oily or Wet Fluids	High	Low to Moderate Warm & Cold

“INNOVATION IN THE SERVICE OF THE ENVIRONMENT”

G-Tek® 3RX / **1st Range of gloves made from recycled plastic bottles**

Certified by USB Registration no: USB 002629

The Global Recycled Standard (GRS) is a paid certification and voluntary international standard verified annually. It sets out criteria for third party certification of recycled content, chain of custody, social and environmental practices, and chemical composition restrictions. The GRS standard allows you to measure the percentage of recycled fibers used in the design of the support. It also defines the requirements for water consumption, waste management and wastewater treatment. Specifically, the GRS standard certifies that the weight of a product is made up of 50% or more of recycled material.

The Recycled Claim Standard, based on the Global Recycled Standard, also allows you to check the recycled content of a product. To obtain RCS certification, the product must contain at least 5% recycled fibers.

31-330R-EN
G-TEK® 3RX

Grippaz®

Patented Non-Slip Gloves

**RESISTANT
&
DURABLE**

LASTS UP TO
5 TIMES LONGER
THAN NORMAL
DISPOSABLE
GLOVES.

**SETTING NEW STANDARDS
FOR THE GRIP**

- Protection from chemicals and viruses
- Internal traction support
- Adherent to hand
- Touch-Screen compatible
- 100% Nitrile

Grippaz is a range of semi-disposable gloves that has revolutionised the use of gloves in industry and the automotive sector. Made with a special formula of NBR (Nitrile Rubber), provides an excellent protective barrier against many chemicals, oils, grease, blood pathogens and viruses.

The patented herringbone grip has been independently tested and approved by the renowned British laboratory SATRA, certifying the superior grip compared to other disposable gloves of the same thickness.
